

# Joint Federal Interagency Conference on Sedimentation and Hydrologic Modeling (JFIC2010)

June 27 – July 1, 2010

Riviera Hotel, Las Vegas, Nevada

Theme: *Hydrology and Sedimentation for a Changing Future:  
Existing and Emerging Issues*

Sponsored by the ACWI's Subcommittees on Hydrology and Sedimentation  
(Advisory Committee on Water Information)

[www.jfic.us](http://www.jfic.us)

# Joint Federal Interagency Conference on Sedimentation and Hydrologic Modeling (JFIC2010: 9<sup>th</sup>FISC & 4<sup>th</sup>FIHMC)

June 27 – July 1, 2010

Riviera Hotel, Las Vegas, Nevada

Theme: *Hydrology and Sedimentation for a Changing Future:  
Existing and Emerging Issues*

**BACKGROUND:** The Federal Interagency Sedimentation Conferences (FISC) began in 1947, and the Federal Interagency Hydrologic Modeling Conferences (FIHMC) began in 1998. These highly successful conferences, which together have produced over 2100 technical papers, will be held again jointly in 2010. The Joint Conference will provide Federal and non-Federal scientists and managers from various disciplines the opportunity to discuss recent accomplishments and progress in research and on technical developments in the physical, chemical, and biological aspects of sedimentation and the development and use of models addressing surface water quality and quantity issues. The Joint Conference will follow a mixed set of formats including formal technical presentations, poster sessions, field trips, short courses, and model demonstrations. A separate student poster paper session and competition for cash prizes is also scheduled.

The Subcommittee on Hydrology (SOH) held the Federal Interagency Workshop on Hydrologic Modeling Demands for the 90's in Fort Collins, Colorado, in 1993. That highly successful workshop was limited to Federal participants. Subsequent to that workshop, the SOH decided to hold a broader series of conferences and to open it to all interested parties. Federal Interagency Hydrologic Modeling Conferences were held in 1998, 2002, and 2006, and covered models addressing surface water quality and quantity issues.

Federal Interagency Sedimentation Conferences (FISC) were held in 1947, 1963, 1976, 1986, 1991, 1996, 2001, and 2006. As a continuation of these highly successful conferences, the 9<sup>th</sup>FISC will again provide an interdisciplinary mix of scientists and managers from government agencies, academia, and the business community to make professional presentations on recent accomplishments and progress in research and on technical developments related to sedimentation processes and the impact of sediment on the environment.

This is the first announcement of the 2<sup>nd</sup>JFIC2010 Conference and technical agenda. Some changes may occur by the start of the Conference and will be reflected in the final on-site program.

**CONFERENCE SITE:** The Conference will be held at the Riviera Hotel in Las Vegas, Nevada, USA. The area offers spectacular desert landscapes and ecosystems, as well as numerous indoor and outdoor recreational opportunities.

**TOPICS:** About 264 technical papers, 70 posters, and 11 modeling demonstrations have been accepted for presentation. These are from the United States and several foreign countries and incorporate results of recent research and technology development, as well as applications relating to surface water modeling. Papers and posters will be given on the following topics:

- Adaptive Hydraulics Model (ADH)
- Climate Variability / Impact
- Conservation Effects Assessment Project (CEAP)
- Dam Breach Modeling
- Dam Removal
- Environmental River Management
- Flood Hydrology
- Fluvial Geomorphology
- GIS Technology in Water Resources
- Gully Erosion Assessment, Development, Processes, and Modeling
- Hydroecological Modeling
- Instrumentation Monitoring
- Management & Decision Making Models
- Modeling of Major River Systems
- Mt. St. Helens Sedimentation
- Reservoir Sedimentation
- Sand and Gravel Interactions
- Sediment Impact Assessment Model (SIAM)
- Sediment Measurement
- Sediment Surrogates
- Sediment Transport
- Soil Erosion Measurements and Research
- Stream Restoration
- Streambank Erosion
- Turbidity
- Watershed Planning
- Watershed Sediment Analysis

For a complete listing of the papers accepted for presentations see the “Technical Papers, Posters, and Model Demonstrations” section at the end of this announcement.

**OPENING SESSION:** The Conference Chairs will make welcoming remarks and opening statements. A local welcoming speaker and several prominent keynote speakers, including Matt Larson, Associate Director for Water (USGS) and alternate Chair of the Advisory Committee on Water Information, will also address the Conference.

**EXHIBITS:** Exhibitors are being solicited in the following areas: Surface water, sediment, and water-quality-data collection, recording, and analysis equipment and software; laboratory equipment; erosion-control products; computer hardware and software for collection, distribution, and/or analysis of hydrologic data; surveying equipment, both for land and underwater use; hydrologic, sedimentation, climate variability/change, and decision support systems modeling firms; and any other related equipment or services related to the theme of the Conference.

The Exhibit Hall will contain about 35 10x10-foot booths and will be open during conference hours on Sunday through Tuesday. A Grand Opening of the Exhibit Hall is planned for Sunday and will include a two-hour get acquainted reception in the Exhibit Hall from 5:30pm to 7:30pm. All Monday and Tuesday coffee breaks, poster sessions, and receptions will also be held in the Exhibit Hall to insure that participants have ample time to visit all the exhibits. A special Exhibitor's Reception and Student Poster Session is planned for Monday evening following the Technical Sessions. Exhibits will close around 3:30pm on Tuesday. The rental fee for each booth will be \$850 and will include one complimentary full conference registration. See the Exhibitor information on [www.jfic.us](http://www.jfic.us) or for additional information contact Mr. Joe Treadway, USGS Hydrologic Instrumentation Facility, Building 2101, Stennis Space Center, MS 39529; phone 228-688-3573; FAX 228-688-1577; [jbttread@usgs.gov](mailto:jbttread@usgs.gov).

### **STUDENT PROGRAM/POSTER PAPER COMPETITION**

Student posters on sedimentation and hydrologic modeling will also be displayed and presented during the Exhibitor's Reception on Monday evening. See the list of student posters later in this announcement. For abstracts that are accepted for either oral or poster presentation, students will be asked to submit a paper (maximum of 12 pages). The student authors will present their topics, and their posters and papers will be judged for cash prizes. Separate cash awards (>\$500) will be given to the best papers and best posters.

A special student lunch session on Monday will be provided where students will have a chance to learn about careers in the Federal Government.

The student registration fee for the conference is substantially reduced. Full-time students may register for the conference at a special fee of \$180 before May 31, 2010, and \$210 after May 31 or onsite. The conference registration fee will be waived for selected students who volunteer to operate computers and projectors (audio visual assistants). Any full time student that is interested in volunteering as an audio/visual assistant should contact Jeff Harris for details (530-756-1104, [David.J.Harris@usace.army.mil](mailto:David.J.Harris@usace.army.mil)). Limited funds are available to assist students with travel and hotel expenses on a case-by-case basis, depending on the expressed need. Preference will be given to students who are presenters and who volunteer to serve as audio visual assistants. For more information concerning student assistance and the procedure for applying for travel assistance, contact Dr. Richard H. Hawkins, University of Arizona (520-621-7273, [rhawkins@Ag.arizona.edu](mailto:rhawkins@Ag.arizona.edu)).

**MODEL DEMONSTRATIONS/POSTER SESSION AND DINNER:** A 4.5-hour session for computer-model demonstrations and posters, including sedimentation and hydrologic modeling, will be offered Wednesday afternoon and evening. A light dinner will be provided during this time. See the "Technical Papers, Posters, and Model Demonstrations" section of this announcement for a listing of the Model Demonstrations.

**WHO SHOULD ATTEND:** Federal, State, and local agency personnel, consultants, and researchers involved in the development and/or implementation of surface-water quantity and quality models, as well as individuals involved in decision making that depends on information developed by these hydrologic-based models should attend. Individuals from outside of the United States are encouraged to attend the conference.

**SPONSORS:** Subcommittees on Hydrology and Sedimentation under the Advisory Committee on Water Information.

### **ORGANIZATIONS**

American Forests	National Hydrologic Warning Council
American Society of Civil Engineers	National Park Service
Association of State Floodplain Managers	National Science Foundation
Bureau of Land Management	NOAA–National Weather Service
Bureau of Reclamation	Office of Surface Mining
Colorado Water Resources Research Institute	U.S. Environmental Protection Agency
Defenders of Property Rights	U.S. Geological Survey
DOD–U.S. Army Corps of Engineers	Universities Council on Water Research
Electric Power Research Institute	USDA–Agricultural Research Service
Federal Emergency Management Agency	USDA–Forest Service
Federal Energy Regulatory Commission	USDA–Natural Resources Conservation Service
Federal Highway Administration	
International Boundary and Water Commission	

### **ORGANIZING COMMITTEES**

#### **2<sup>nd</sup> Joint Federal Interagency Conference**

Doug Glysson, 2<sup>nd</sup> JFIC Chair; USGS, 412 National Center Reston, VA, 20192, 703-648-5019, [gglysson@usgs.gov](mailto:gglysson@usgs.gov)

Paula Makar, Operations Chair; Bureau of Reclamation, P.O. Box 25007 M/C D-8540, Lakewood, CO 80225, 303-445-2555, [pmakar@usbr.gov](mailto:pmakar@usbr.gov)

Francisco Simoes, Proceedings Coordinator, USGS, Box 25046, MS 413, Lakewood, CO 80225, 303-236-4556, [frsimoes@usgs.gov](mailto:frsimoes@usgs.gov)

Jeff Rieker, Registration Chair; Bureau of Reclamation, 775-884-8375, [jrieker@usbr.gov](mailto:jrieker@usbr.gov)

Tim Rowe, Field Trip Coordinator, U.S. Geological Survey

Tim Randle, Poster/Demonstration Coordinator, Bureau of Reclamation

Joe Treadway, Exhibitor Coordinator, USGS Hydrologic Instrumentation Facility, Building 2101, Stennis Space Center, MS 39529, 228-688-3573, [jbtread@usgs.gov](mailto:jbtread@usgs.gov)

Jayantha Obeysekera, Short Course Coordinator, South Florida Water Management District  
Cassie Klumpp, Spousal and Guest Program Coordinator, Bureau of Reclamation, 303-445-2554, [cklumpp@usbr.gov](mailto:cklumpp@usbr.gov)

Jeff Harris, Computer/AV Equipment Coordinator, U.S. Army Corps of Engineers, 530-756-1104, [David.J.Harris@usace.army.mil](mailto:David.J.Harris@usace.army.mil)

Richard H. Hawkins, Student Program, University of Arizona, 520-621-7273, [rhawkins@Ag.arizona.edu](mailto:rhawkins@Ag.arizona.edu)

### 9<sup>th</sup> Federal Interagency Sedimentation Conference (9<sup>th</sup> FISC)

Jerry Bernard, Chair, USDA-Natural Resources Conservation Service, P.O. Box 2890, Washington, DC 20250, 202-720-5356, [jerry.bernard@wdc.usda.gov](mailto:jerry.bernard@wdc.usda.gov)  
Jerry Webb, 9<sup>th</sup> FISC Technical Program Chair, U.S. Army Corps of Engineers, 441 G Street, NW, 3K22, Washington, DC 20314, 202-761-5543, [Jerry.w.webb@usace.army.mil](mailto:Jerry.w.webb@usace.army.mil)  
Marie Garsjo, Audio/Visual Coordinator, USDA-Natural Resources Conservation Service

### 4<sup>th</sup> Federal Interagency Hydrologic Modeling Conference (4<sup>th</sup> FIHMC)

Don Frevert, 4<sup>th</sup> FIHMC Chair; U.S. Bureau of Reclamation (retired), 2034 South Xenon Court, Lakewood, CO 80228, 303/989-4270 [dkfrevert@netzero.net](mailto:dkfrevert@netzero.net)  
Don Woodward, 4<sup>th</sup> FIHMC Technical Program Chair, USDA– Natural Resources Conservation Service (retired), 7718 Keyport Terrace, Derwood MD 20855, 301-977-6834, [dew7718@comcast.net](mailto:dew7718@comcast.net)  
Jeff Harris, Audio/Visual Coordinator, U.S. Army Corps of Engineers

**TRANSPORTATION.** Las Vegas McCarran International Airport (LAS) is the main airport serving the Las Vegas metropolitan area. It is located about 3.5 miles from the Riviera Hotel. Transportation from the airport to the Riviera is available through airport shuttles (\$6 to \$7 one-way fares) outside the baggage claim area, or by taxicab.

## REGISTRATION

### Registration fee:

**\$425 before May 31, 2010**

**\$475 after May 31 and onsite**

### Includes:

- **Conference Proceedings**
- **Grand Opening Reception**
- **Monday's Reception**
- **All refreshment Breaks**
- **Demonstration Dinner**

Registration for single day attendance is also available. Single day attendance will include a copy of the conference proceedings and all functions occurring on that day. Please go on-line to <http://www.jfic.us> or use the **Conference Registration Form** at the end of this announcement to register. Registration forms and payments sent by mail must be postmarked prior to May 31, 2010 in order to receive the discounted rate. Payment must be made at the time of registration, and all credit card payments will be charged at the time of registration. Spouse registration is \$80 before May 31, 2010 and \$110 after May 31, 2010, and includes all of the above, except for the proceedings. For additional spousal activities, please see the Guest Program below.

The registration desk is located next to the Business Center and adjacent to the Grande Ballroom in the Riviera Convention Center. On-site registration will be open as follows:

On-Site Registration Desk Open		
Sunday	June 27	7:00 a.m. to 6:00 p.m.
Monday	June 28	7:00 a.m. to 5:30 p.m.
Tuesday	June 29	8:00 a.m. to 5:30 p.m.
Wednesday	June 30	8:00 a.m. to 5:30 p.m.
Thursday	July 1	8:00 a.m. to 1:00 p.m.

**STUDENT REGISTRATION:** Full-time students may register for the conference at a special fee of \$180 before May 31, 2010, and \$210 after May 31 or onsite. These fees include all of the above full conference registration items. Student identification is required. A limited number of student registration fees will be waived for students interested in providing on-site audio-visual support. Interested students should contact Jeff Harris at [david.j.harris@usace.army.mil](mailto:david.j.harris@usace.army.mil) or 530-756-1104 prior to May 31, 2010.

**CANCELLATIONS:** Cancellation with full refund will be accepted if received in writing no later than May 31, 2010. A \$50 processing fee will be deducted from written cancellations received between June 1 and June 24. NO REFUNDS WILL BE GIVEN FOR CANCELLATIONS RECEIVED AFTER JUNE 24, 2010.

**HOTEL REGISTRATION:** The Conference will be held at the Riviera Hotel and Casino, Las Vegas, Nevada, USA. A block of rooms under the Group “Joint Federal Interagency Conference” has been reserved at a special room rate of \$79 + tax, single or double occupancy for the Conference. This rate is good for 3 days prior to and after the conference. For all other rooms and suites, please contact the hotel directly.

Rooms will be assigned on a first-come, first-served basis from the reserved block. Rooms not assigned from the block by **May 31, 2010**, will be released, and reservations after that date will be handled on a space-available basis. To make your room reservations, call the hotel (1-800-634-6753 or 702-734-5110 and state that you are attending the Joint Federal Interagency Conference), or register online at [www.jfic.us](http://www.jfic.us). Your credit card will only be used to hold your room. You may cancel your reservation without penalty up to 24 hours prior to your scheduled arrival date. We advise you to make your reservation early, as we anticipate the conference will be well attended.

**GUEST PROGRAM: Welcome room for guests of conference attendees**—The conference will provide a room for registered guests of conference attendees to gather and meet. This room will be open 9:00am to 5:00pm Monday through Wednesday, and 9:00am to noon on Thursday. Brochures from the Las Vegas Visitors Bureau and light refreshments are provided mid-morning and afternoon. The three planned tours (information below) will meet here.

**Madame Tussaud’s Wax Museum** (Monday morning)—Visitors are sent on a unique, historical journey of the realms of the powerful and famous. Guests can see, touch, and hug over 100 lifelike celebrities, sports figures and world icons, all masterfully recreated in wax. Join us during the conference for a special visit to Madame Tussaud’s in Las Vegas. Tickets are about \$18/person plus a transportation fee.

**Jubilee’s Backstage Tour** (Wednesday morning)—To gain true appreciation for “Jubilee!,” the backstage tour is a great tour. Hosted by one of the show’s charismatic cast members, a “Jubilee!” dancer takes guests on an in-depth look at costumes, props, headdresses and much more. Join us during the conference for a Backstage Tour of Jubilee, cost \$25/person plus transportation fee.

**Ice at the Riviera** (Monday evening)—It is Ice. It is air. It is everything unlike anything in between. Russia’s most disciplined and athletic performers converge on one frozen stage to

bring you an unprecedented epic production. Join us Monday night after the Exhibitor's Reception for a special show at the Riviera. A discounted rate is being negotiated with the Riviera hotel and will be announced later.

For more information on the spousal and guest program, contact Cassie Klumpp, [cklumpp@usbr.gov](mailto:cklumpp@usbr.gov) (303-445-2554).

**OPENING RECEPTION:** A get-acquainted reception will be held on Sunday afternoon from 5:30pm to 7:30pm in the Exhibit Hall (Grande Ballroom E-H). Come and visit our exhibitors, meet old friends, and make new ones while enjoying refreshments and hot and cold hors d'oeuvres.

**SPEAKERS' BREAKFAST:** A working breakfast will be served Monday through Thursday for each day's speakers. This will be a full breakfast. All speakers, session chairpersons, and audio/visual (A/V) assistants are requested to attend on the morning of the day of their presentation. Speakers and session chairpersons will be briefed on the day's activities. Speakers will coordinate their presentations with the session chairs and A/V assistants during and after this meeting.

**SPEAKERS' VIEWING ROOM:** A special room will be set up for speakers to view their computer presentations and for session chairpersons and A/V assistants to meet with speakers. Computers will be available throughout the day in this room for previewing.

**PROCEEDINGS:** A printed volume of the Conference papers' abstracts and a CD with the full papers will be provided to all registered attendees. At the conference, additional printed abstract volumes will be available for \$20 and the CD for \$25. To order by mail after the conference, make check or money order payable to the "Federal Interagency Sedimentation Conference," and send to G. Douglas Glysson, USGS Office of Water Quality, 412 National Center, Reston, VA, 20192-5603.

**FIELD TRIPS:** All field trips will meet in the Foyer of the Riviera Conference Center, opposite the JFIC registration desk. Note that field trips are subject to cancellation and refund in case of poor weather conditions or insufficient number of participants. A \$25 fee will be charged for participant cancellation after May 15, 2010.

### **Preconference Field Trip (Thursday, 6/24/10 to Sunday, 6/27/10).**

*The "Grand" Grand Canyon Tour*– Visit Hoover Dam, Grand Canyon National Park south rim, Little Colorado River, Glen Canyon Dam, and take a 16-mile float trip down the Colorado River from Glen Canyon Dam to Lees Ferry. Learn about Grand Canyon geology and river history and how dams have affected river sediment conditions in Grand Canyon and how dam operations have been used as part of an adaptive management program to improve environmental conditions. Field trip participants will stay the night in Williams, AZ; Cameron, AZ; and Kanab, UT, before arriving at the Riviera Hotel, Las Vegas, NV, on June 27<sup>th</sup>.

Agencies involved: Reclamation and the USGS Grand Canyon Monitoring and Research Center.

Cost: \$295, includes bus transportation, lunches, snacks, park entrance fees, and float trip (lodging, breakfasts, and dinners are not included). Registrants must make and pay for their own lodging reservations from a block of rooms in reserve until May 25, 2010, under the name of "Federal Conference Tour" (see below for contact information).

**Thursday, June 24, 2010, 2:00pm to 3:00pm:** The tour bus will depart directly from the Las Vegas McCarran (LAS) airport by 3:00pm for a tour of Hoover Dam (about a 40-mile drive). 6:00pm to 7:00pm: Dinner in Kingman, AZ (about a 70-mile drive from Hoover Dam) and then continue another 110 miles to Williams, AZ, for lodging:

- Fairfield by Marriott (928-635-9888), \$69 per room + tax, breakfast included, <http://www.marriott.com/hotels/travel/flgwl-fairfield-inn-williams-grand-canyon/>

**Friday, June 25, 2010.** From Williams, AZ, field trip participants will proceed by bus to Grand Canyon National Park (about a 60-mile drive). At the south rim of Grand Canyon, participants will learn about canyon geology and river history. The tour bus will then continue to Cameron, AZ (about a 60-mile drive) where participants will learn about the Little Colorado River geomorphology. Lodging will be in Cameron, AZ:

- Cameron Trading Post Lodge (1-800-338-7385), \$99 per room + tax, <http://www.camerontradingpost.com/lodge.html>

**Saturday, June 26, 2010.** From Cameron, AZ, field trip participants will proceed by bus to Page, AZ (about a 90-mile drive) for a tour of Glen Canyon Dam. From the base of the dam, field trip participants will board rafts for a 16-mile float trip down the Colorado River to Lees Ferry, AZ (There are no rapids on this float trip, and luggage will remain on the bus). While on the river, participants will learn about the Grand Canyon Monitoring and Research Center, Adaptive Management Program, and sediment related research. From Lees Ferry, participants will proceed by bus to Kanab, UT, for dinner and lodging (about a 120-mile drive from Lees Ferry, AZ):

- Holiday Inn Express (435- 644-3100), \$85 per room + tax, breakfast included, <http://www.ichotelsgroup.com/h/d/ex/1/en/hotel/knbut>

**Sunday, June 27, 2010.** Field trip participations will get to see eolian sedimentary structures near the east entrance of Zion National park and then continue by tour bus to Las Vegas (about a 200-mile drive from Kanab, UT) and end field trip by 2:00pm at the Riviera Hotel.

## **Additional Field Trips on Sunday, June 27, 2010:**

***Hoover Dam and new Hoover Dam Bypass Project Bridge*** – 10:00am to 4:00pm, \$60, Lunch provided. Visit Hoover Dam, the new visitor center and tour inside the dam. Also hear about and view construction of the new Hoover Dam Bypass Project bridge over the Colorado River below Hoover Dam. Agencies involved: USBR, FHWA, NPS, WAPA, Arizona DOT, Nevada DOT, and Central Federal Lands Highway Division (CFLHD). Websites of interest: <http://www.usbr.gov/lc/hooverdam/> and <http://www.hooverdambypass.org/>.

***Spring/Ecology Tour of Muddy River -Virgin River Valley areas*** – 9:30am to 3:30pm, \$60, Lunch provided. Tour Monitoring/restoration efforts within the regional White River Carbonate groundwater flow system terminal discharge area and Muddy River Springs Complex. Visit various springs (Warm, Pederson, Rogers , and Blue Point Springs for example), hear about current/historical flows, flow credits, fish studies and habitat restoration efforts, get close to Moapa Dace at Moapa Springs National Wildlife Refuge Visitor Center and Fish Viewing chamber and then Virgin/Muddy River real-time flow and sediment study and recent Virgin River floods, State of Nevada Lost City museum in Overton and possibly visit/take a short hike to the ghost town of St Thomas, an old abandoned town site, while Lake Mead is low. Coordinated by BLM, USBR, USFWS, USGS, State of Nevada, SNWA, The Nature Conservancy, Clark County, and Virgin Valley Water District. Websites of interest: <http://www.fws.gov/desertcomplex/moapavalley/>; [http://www.snwa.com/html/env\\_muddyrvr\\_research.html](http://www.snwa.com/html/env_muddyrvr_research.html); <http://waterdata.usgs.gov/nv/nwis/current/?type=flow>; <http://www.nature.org/wherewework/northamerica/states/nevada/preserves/art11308.html>; <http://www.ghosttowns.com/states/nv/st.thomas.html>

***Red Rock Canyon National Conservation Area*** – 9:00am to 3:00pm, \$60, Lunch provided. Experience cultural, geological, and biological resources, sandstone quarry, Willow Springs, Red Rock Scenic Road Loop, Red Rock Visitor Center, Spring Mountain Ranch State Park, Quickbird Study in Red Rock National Conservation Area near urban Las Vegas. Coordinated by BLM, USGS, Friends of Red Rock and Nevada State Parks. Websites of interest: [http://www.blm.gov/nv/st/en/fo/lvfo/blm\\_programs/blm\\_special\\_areas/red\\_rock\\_nca.html](http://www.blm.gov/nv/st/en/fo/lvfo/blm_programs/blm_special_areas/red_rock_nca.html); <http://www.redrock.org/>; <http://www.parks.nv.gov/smr.htm>

**SHORT COURSES.** Note: Short courses are subject to cancellation and refund if the number of registrants are not sufficient to cover the class. Non-conference attendees can register but will have a lower priority than those who register for the full conference. A \$25 handling fee will be charged if a registration for a short course is cancelled after May 15, 2010.

Short Course Title	Fee	Time	Day
Stream Restoration Design	\$ 100	8:00am-5:00pm	<b>Sunday,</b> June 27, 2010
SRH 2D	\$ 75	8:00am-5:00pm	
Fluvial-Sediment Data	\$ 45	1:00pm-5:00pm	
RiverWare	\$ 250	8:30am-5:00pm	
Curve Number Rainfall-Runoff	\$ 120	9:00am-4:00pm	
Sediment Transport Modeling	\$ 50	1:00pm-5:00pm	<b>Thursday,</b> July 1, 2010
Principles of Streambank Erosion	\$ 210	10:30am-5:00pm	
SEAWAT	\$ 200	10:30am-5:00pm	
HEC-HMS	\$ 100	1:00pm-5:00pm	
EXCEL-LEnT	\$ 210	10:30am-5:00pm	

All Sunday courses that start before noon will have morning breaks. All Sunday courses will have afternoon breaks. All Thursday courses will have afternoon breaks only. No lunches are included.

**Short Courses: Sunday, June 27, 2010**

***Stream Restoration Design. Sunday, 8:00am to 5:00pm, \$100***

Instructors: Jon Fripp, USDA-NRCS National Design, Construction, and Soil Mechanics Center; Kerry Robinson, USDA-NRCS East National Technology Support Center; Jerry Bernard, National Geologist, USDA-NRCS Conservation Engineering Division; and Dave Rosgen, Wildland Hydrology (wildlandhydrology.com)

The USDA Natural Resources Conservation Service (NRCS) has recently released a stream design guide that is a companion to the 1998 interagency document, "Stream Corridor Restoration: Principles, Processes, and Practices". This comprehensive design guide, titled USDA-NRCS NEH-654 Stream Restoration Design Handbook, presents engineering assessment and design tools that are applicable to any stream restoration work, whether it primarily follows a natural stream restoration or is strictly a structural project. The basis for this short course will be this USDA-NRCS Stream Restoration Design Handbook, which was released in August of 2007. A copy of this handbook on CD will be provided to the students. Although the importance of proper planning for stream restoration work will be stressed, the focus of this workshop will be on selected design tools and procedures from the USDA-NRCS Stream Restoration Design Handbook. Specific design tools and short example problems will be provided.

The course will focus on the basics of design techniques which have been compiled from over 120 contributing authors and practitioners. The course is therefore of benefit to those who are or will become engaged in designing stream restorations.

***SRH 2D (U.S. Bureau of Reclamation's two-dimensional hydraulic and sediment transport model-river hydraulics modeling). Sunday, 8:00am to 5:00pm, \$75***

Instructors: Yong Lai and Blair Greimann, U.S. Bureau of Reclamation

SRH-2D is a two-dimensional (2D) depth-averaged hydraulic and sediment transport model for river systems developed at the U.S. Bureau of Reclamation. It has been used both at Reclamation and many outside institutions, with great success. SRH-2D has a few boasting features. First, SRH-2D uses a flexible mesh that may contain arbitrarily shaped cells. In practice, the hybrid mesh of quadrilateral and triangular cells is recommended though purely quadrilateral or triangular elements may be used. A hybrid mesh achieves the best compromise between solution accuracy and computing demand. Second, SRH-2D adopts very robust and stable numerical schemes with seamless wetting-drying algorithm. Reliable solutions may be obtained with few tuning parameters; program “crash” rarely occurs.

SRH-2D is also developed with the objective that a 2D model does not have to be too complex to use. With SRH-2D, users do not have to memorize many commands; they are guided by a preprocessor. SRH-2D model, along with the manual and selected application cases, are freely downloadable at the following Bureau of Reclamation site:

<http://www.usbr.gov/pmts/sediment>.

The goal of this course is to train attendees to become “modelers” who are knowledgeable about 2D modeling and may apply SRH-2D to their own projects. In the class, the theory of 2D modeling will be given, range of problems that may be solved by SRH-2D are presented with real-life project examples, students will jump into the use of SRH-2D immediately with instructor provided sample cases. It is crucial for students to bring their own laptops to get hands-on experience. Students may also bring their own problems to the class. At the end of the class, it is expected that students can apply SRH-2D to their own projects and know the key steps and key parameters for a successful 2D analysis.

Students are expected to bring their own laptops for use during the workshop.

***RiverWare – an Overview for Managers. Sunday, 8:30am to 5pm, \$250,***

Instructor: Edith Zagona, CADSWES, University of Colorado.

RiverWare is a modeling tool used for forecasting and scheduling reservoir and hydropower operations, water rights and water accounting, evaluating alternative operating policies, and planning new projects. RiverWare is used extensively by major water management agencies, utilities, research institutes and consulting companies. This course presents a hands-on overview of RiverWare’s capabilities particularly designed for managers to assess the potential use of this tool in their organizations. Through demonstrations and exercises, the course will teach you how RiverWare works, how it can be integrated with other models, databases and analysis tools, and will show some example applications. The course will focus on: what is involved in building a model; how multi-objective policies are represented and solved using rulebased simulation; how water ownership is represented and tracked; prioritized water rights solution; flood control algorithms; groundwater-surface water modeling; how RiverWare can automatically communicate with data sources and other programs; output options; how to use multiple run management with stochastic inputs to generate probabilistic results; multi-objective optimization including hydropower scheduling, and special features for usability and runtime analysis. Examples of applications will illustrate these features.

Students are expected to bring their own laptops for use during the workshop.

**Curve Number Rainfall-Runoff: Professional Application. Sunday, 9:00am to 4:00pm, \$120**

Instructors: Richard H. Hawkins, University of Arizona; and Don Woodward, U.S. Department of Agriculture

This short will cover the following sections:

- Chronology, development, and methodology basics, original goals, limitations, watersheds and data. Also to be covered are Development assumptions and assertions, soils tie-ins, NEH4, Ia/S, CN aligner. Usage conventions.
- Reevaluation and reinterpretation (1½ hr), Background and handbook tables. Alternate expressions. Three modes of CN: Rainfall-runoff return period concepts; random component interpretations, process approximations. AMCs-ARCs and handbook CN tables. Sensitivity.
- Recent work (2 hr). Curve Numbers meet reality: How watersheds and Curve Numbers *really* act; Runoff behavior types; a second look at Ia/S; Hydrologic Soil Groups, CN application explosion, seasonal CNs. Universal runoff response types and CN forms; infiltration and losses. Local calibrations.
- CN method vis-a-vis general rainfall-runoff hydrology: Does "S" exist? Complacent/Violent thresholds, international applications.
- Summary analysis, questions, answers, discussions: Some do's and don'ts, FAQs: Professional use, perspectives and ponderings. Improvements, replacement? Class participation, critique, user anecdotes. Improvements, replacement? Research and development needs?

Participants will be provided with a course workbook (~100 pages), PowerPoint printouts and handouts. Some of the figures, tables, and handout sheets are shared with the "Report of the ASCE Task Committee on the State of the Practice in Curve Number Hydrology", by Hawkins, Ward, Woodward, and VanMullem, ca 1115pp. 2009. The report itself is not supplied as a part of the course. It may be obtained from ASCE for \$52.50 (members) or \$70.00 (nom-members).

**Overview of Collection of Fluvial-Sediment Data. Sunday, 1:00pm to 5:00pm, \$45**

Instructors: John R. Gray, G. Douglas Glysson, and Gary Johnson, U.S. Geological Survey

This short course provides an overview of basic fluvial-sediment data-collection techniques with emphasis on fluvial-sediment concepts, sampler characteristics, and sampling techniques. Methods for collecting suspended-sediment data are emphasized, but overviews of bedload and bed-material data collection techniques are included. Basic requirements for collecting sufficient, useful sediment data, and considerations in data quality are also presented.

The course is geared for professionals and technicians who will be, or are planning on, collecting suspended-sediment data. U.S. Geological Survey Techniques of Water-Resources Investigations Book 3, C2, "Field Methods for Collection of Fluvial Sediment" and several dozen additional technical resources will be provided on a CD-ROM.

This short course is a synopsis of the full 5-day course, “Sediment Data Collection Techniques,” offered annually by the U.S. Geological Survey in Castle Rock and Vancouver, Washington, (contact J. R. Gray at [jrgray@usgs.gov](mailto:jrgray@usgs.gov) for more information on the full course offering).

### **Short Courses: Thursday, July 1, 2010**

***Principles of Streambank Analysis and Stabilization. Thursday, 10:30am to 5:00 pm, \$210***  
Instructor: Andrew Simon, USDA Agricultural Research Service, National Sedimentation Laboratory, Oxford, MS

This one-day lecture course is designed for professionals engaged in stream investigation, management, stabilization and restoration. The course is designed to clearly demonstrate the essential links between research, analysis, design, project implementation, and post-project evaluation. Lectures will introduce the fundamental concepts linking streambank processes and geomorphic adjustments in the fluvial system. Field methods to rapidly evaluate the relative stability of alluvial channels and to quantify force and resistance mechanisms that control streambank-erosion processes, failure mechanisms, and the importance of basal scour to sustained bank retreat will be described in detail. Hands-on modeling will provide students with the opportunity to investigate the factors which control bank stability, while also recognizing the significance of these factors when designing mitigation measures. All students will be provided with bank-stability modeling software (with sound effects) for future use, and a CD containing all lectures (in PowerPoint and PDF), and PDFs of relevant technical papers.

Course highlights include: Review of fundamental principles behind channel adjustment; Role of bank erosion in fluvial adjustment and sediment yields; Mechanics of streambank erosion; Field investigation methodologies; Bank-stability modeling; Application of the model for design, mitigation strategies, and sediment loadings; Guiding principles for bank stabilization.

Prerequisites: Students attending this course should have solid algebraic and analytical skills. Experience using Microsoft Excel or similar spreadsheet programs is highly recommended.

A laptop computer is also recommended for running bank-stability software provided during class.

***Variable-Density Groundwater Flow and Solute Transport Modeling using SEAWAT, Thursday. 10:30am to 5:00 pm, \$200***

Instructor: Alyssa Dausman, U.S. Geological Survey

This workshop is an introduction to three-dimensional variable-density groundwater flow and solute transport using SEAWAT, a MODFLOW/MT3DMS-based program. SEAWAT has been applied to a wide variety of problems including saltwater intrusion, aquifer storage and recovery (ASR), deep-well injection, as well as inland brine transport. The newest version of SEAWAT (Version 4) can also be used to simulate simultaneous solute and heat transport including variations in viscosity from changes in temperature and/or solute. As part of this workshop, participants will develop an understanding of: (1) the fundamentals behind

SEAWAT, (2) the procedure for designing a SEAWAT model, and (3) the types of problems it can be used to solve.

Students will need to bring their own laptops for the workshop

**EXCEL-LEnT Training for Water Managers. Thursday, 10:30am to 5:00 pm, \$210**

Instructor: Darrell G. Fontane, Colorado State University.

This workshop is designed to teach participants how to use some of the features of EXCEL that are particularly relevant to engineering and water resources analysis. It will provide you with examples of engineering applications of EXCEL that demonstrate the features presented in the workshop. Participants will receive a CD containing all the files used at the workshop and accompanying computer-based video tutorials that cover the workshop topics. Participants can review these tutorials to help them remember the techniques presented. The workshop will be based on EXCEL 2007. Note however, that the topics presented in the workshop are applicable to previous versions of EXCEL.

Water managers often develop spreadsheets for their own use or to be shared with colleagues. Spreadsheets should be easy to use with required problem data input clearly identified and the output easy to understand. A variety of EXCEL's tools can be used to minimize errors and to minimize the effort required to provide required input or to perform analyses in the spreadsheet. This workshop will focus on the functionality EXCEL provides to meet these goals of Positive User Guidance, Clarity and Correctness.

EXCEL software provides many features that allow the user to develop input controls to make the spreadsheet easy to use and minimize errors. These features include a variety of buttons, list boxes, check boxes and spinner controls. These controls can be used in conjunction with table lookup functions, logical IF tests and conditional formatting to do many things. Further, EXCEL allows the user to record or develop custom macros in Visual Basic for Applications that greatly extend the problem solving power of EXCEL. With a surprisingly small number of Visual Basic for Applications (VBA) commands, users can create their own powerful custom macros and custom scientific or engineering functions.

Each student will need to bring a laptops **with EXCEL 2007 installed**

***Basic Principles and Data Needs of Sediment Transport Modeling. Thursday, 1:00pm to 5:00pm, \$50***

Instructors: Blair Greimann and Yong Lai, U.S. Bureau of Reclamation

This short course will introduce the basic principles of designing a successful sediment transport modeling analysis. Participants will be exposed to a wide range of applications of sediment transport modeling issues. The course will discuss the selection of the sediment transport model and steps in the selection process: identification of the question you want to answer, identification of the process you want to simulate, understanding the limitations of various model types, and then the review of current models. The abilities and limitations of various sediment transport model types, such as sediment budget, one-dimensional, and two-dimensional sediment transport models will be discussed. The course will describe the data requirements and data collection activities necessary for the model input. The focus will be on the collection of information relevant to the particular question you wish to address. Various

methods to calibrate model parameters using historical data will be given and, in the absence of historical data, selection of model parameters and sediment transport formulae will be discussed. Finally, if time allows, methods to address model uncertainty will be suggested.

Students may bring their own laptop computers for use during the workshop, but they are not absolutely necessary.

**HEC-HMS and HEC-GeoHMS. Thursday, 1:00pm to 5:00pm, \$100**

Instructors: Hydrologic Engineering Center Staff

The Corps of Engineers Hydrologic Engineering Center's HEC-HMS program and its GIS companion product HEC-GeoHMS are widely used within the engineering community. GeoHMS, an ArcView and ArcGIS extension, is used for pre-processing of an HMS dataset. It allows users to visualize spatial information, document watershed characteristics, perform spatial analysis, delineate basins and streams, and construct an HMS basin file. HMS simulates the precipitation-runoff processes of a dendritic watershed. It provides a wide variety of mathematical models for representing the mass and energy fluxes of the hydrologic cycle: precipitation, evapotranspiration, snowmelt, infiltration, surface runoff, baseflow, channel routing, reservoirs and diversions among others. These model choices include girded and area-averaged methods for event or continuous simulation. This short course will provide an overview and sample application of HMS and GeoHMS.

## Schedule at a Glance, Joint 9<sup>th</sup> FISC and 4<sup>th</sup> FIHMC, 2010

THURSDAY, 6/24/2010						
2:00pm @ LAS Airport	Pre-Conference Field Trip: The "Grand" Grand Canyon Tour, 6/24/2010 through 6/27/2010. Ends Sunday, 6/27/10 by 2:00pm.					
SUNDAY, 6/27/2010						
9:00am- 3:00pm	Field Trip: Red Rock National Conservation Area					
9:30am- 3:30pm	Field Trip: Spring/Ecology Tour of Muddy River/Virgin River Valley Areas					
10:00am- 4:00pm	Field Trip: Hoover Dam and New Hoover Dam Bypass Project Bridge					
8:00am- 5:00pm	Short Course: <i>Stream Restoration Design</i>					
8:00am- 5:00pm	Short Course: <i>SRH 2D (U.S. Bureau of Reclamation's 2-dimensional hydraulic and sediment transport model-river hydraulics modeling)</i>					
8:30am- 5:00pm	Short Course: <i>RiverWare – an Overview for Managers</i>					
9:00am- 4:00pm	Short Course: <i>Curve Number Rainfall-Runoff: Professional Application</i>					
1:00pm- 5:00pm	Short Course: <i>Overview of Collection of Fluvial-Sediment Data</i>					
5:30pm- 7:30pm	Opening Reception					
MONDAY, 6/28/2010						
8:30am- 9:30am	Pre-conference refreshment break					
9:30am-12:00pm	Opening Session					
Concurrent Sessions	9 <sup>th</sup> FISC			4 <sup>th</sup> FIHMC		
	A	B	C	D	E	F
1:30pm- 3:00pm	9 <sup>th</sup> FISC session	9 <sup>th</sup> FISC session	9 <sup>th</sup> FISC session	4 <sup>th</sup> FIHMC session	4 <sup>th</sup> FIHMC session	4 <sup>th</sup> FIHMC session

DEMONSTRATIONS/MODELS				
counter	Session	Abstract Title	Authors	Agency
M-1.	Model/Demo	Demonstrating the Capabilities of the KINEROS - AGWA Suite of Modeling Tools: Operational Flash Flood Forecasting and Assessing the Impacts of Management on Nitrate and Pesticide Runoff from an Agricultural Watershed	Carl Unkrich <sup>1</sup> , David Goodrich <sup>1</sup> , Roger Smith <sup>2</sup> , David Woodhiser <sup>2</sup> , Phil Guertin <sup>3</sup> , et al. <sup>1</sup> USDA-ARS, Tucson, AZ; <sup>2</sup> USDA-ARS (Retired), Fort Collins, CO; <sup>3</sup> University of Arizona, Tucson, AZ	USDA-ARS
M-2.	Model/Demo	Demonstration of RiverWare	Dr. Edith Zagona and Davis Neumann, University of Colorado Center for Advanced Decision Support For Water and Environment Systems, Boulder, CO	U of CO
M-3.	Model/Demo	Development and Evaluation of a Component-Based Watershed Model Using the Object Modeling System	Dr. James Ascough II <sup>1</sup> , David Olaf <sup>2</sup> , George Leavesley <sup>2</sup> , Peter Krause <sup>3</sup> , Tim Green <sup>4</sup> , Daniel Moore <sup>5</sup> , Sven Kralisch <sup>3</sup> , and Lajpat Ahuja <sup>4</sup> <sup>1</sup> USDA-ARS, Denver, CO; <sup>2</sup> Colorado University, Boulder, CO; <sup>3</sup> Friedrich-Schiller University, Jena, Germany; <sup>4</sup> ARS, Fort Collins, CO; <sup>5</sup> USDA-NRCS, Portland, OR	USDA-ARS, USDA-NRCS
M-4.	Model/Demo	Hydrologic Modeling System (HEC-HMS): Physically-Based Simulation Components	Dr. William Scharffenberg, Paul Ely, Dr. Steve Daly, Matthew Fleming, and Dr. Jay Pak, USACE Hydrologic Engineering Center (HEC), Davis, CA	USACE
M-5.	Model/Demo	Lake Tahoe Pollutant Load Reduction Model (PLRM)	Brent Wolfe <sup>1</sup> and Mark Leisenring <sup>2</sup> <sup>1</sup> NW Hydraulic Consultants, South Tahoe, CA; <sup>2</sup> GeoSyntec Consultants	Consultant
M-6.	Model/Demo	Method to Construct Zones of Interest Below Dams to Make Rapid Assessment of Detailed Breach Analysis Needs for the 5-Year NID Cycle	Terry Costner, USDA-NRCS, Temple, TX	USDA-NRCS
M-7.	Model/Demo	NRCS WinTR-20 and GEO-HYDRO - Computer Demonstration	William Merkel and Quan D. Quan, USDA-NRCS Beltsville, MD	USDA-NRCS
M-8.	Model/Demo	The Lower Colorado River Authority's Daily River Operations Modeling Project	John Carron <sup>1</sup> and David Walker <sup>2</sup> <sup>1</sup> AMEC Earth and Environmental, Boulder, CO; <sup>2</sup> Lower Co River Authority, Austin, TX	Consultant, Local
M-9.	Model/Demo	The Object Modeling System (OMS): A Collaborative Approach to Component-Based Community Models and Tools	David Olaf <sup>1,2</sup> , Laj Ahuja <sup>2</sup> , George Leavesley <sup>1</sup> , Frank Geter <sup>3</sup> , Ken Rojas <sup>3</sup> , and Jack Carlson <sup>3</sup> <sup>1</sup> CSU, Fort Collins, CO; <sup>2</sup> USDA-ARS, Fort Collins, CO; <sup>3</sup> USDA-NRCS, Fort Collins, CO	USDA-ARS
M-10.	Model/Demo	USDA-ARS/NRCS WinDAM Earthen Embankment Overtopping & Auxiliary Spillway Erosion Prediction	Karl Visser, USDA-NRCS, Fort Worth, TX	USDA-NRCS
M-11.	Model/Demo	Watershed Management and GIS: The Automated Geospatial Watershed Assessment Tool (AGWA) 2.0	Shea Burns, USDA-ARS, Tucson, AZ	USDA-ARS

POSTERS			
	Poster Abstract Title	Authors	Agency
P-1.	A New Sampler for Sampling Bedload in Mountain Streams	Kristin Bunte, Steven Abt, Kurt Swingle, John Potyondy, Engineering Research Center, Colorado State University, Fort Collins, CO	CSU
P-2.	A Sediment Budget of the Town Creek Watershed, MS.	J. Ramírez-Avila, W.H. McAnally, S.L. Ortega-Achury, Jeremy Sharp, Mississippi State University, Starkville, MS	MS State Univ
P-3.	Acoustic Measurement of Fines	James P. Chambers, Ph.D., National Center for Physical Acoustics University of Mississippi, University, MS	Univ. of MS
P-4.	Acoustic Sediment (ACOU-SED) Surrogates in Illinois Streams	Timothy D. Straub <sup>1</sup> , Jon E. Hortness <sup>2</sup> , and James J. Duncker <sup>3</sup> <sup>1</sup> USGS, St. Louis, MO; <sup>2</sup> USGS, Boise, ID; <sup>3</sup> USGS, Urbana, IL	USGS
P-5.	Agricultural Soil Erosion Rates for the Linganore Creek Watershed in the Piedmont Physiographic Province of Maryland	John W. Clune and Allen C. Gellis, USGS, Maryland-Delaware-DC Water Science Center, Baltimore, MD	USGS
P-6.	Case Study: Evaluation of channel forming discharge in the River with calibrated sediment transport functions	Mitch Price, P.E., River Design Group, Inc., South Whitefish, MT	Consultant
P-7.	Channel Change and Bed-Material Transport in the Lower Chetco River, Oregon	Jim E. O'Connor, J. Rose Wallick, Scott W. Anderson, and Charles Cannon; USGS, Portland OR	USGS
P-8.	Channel Changes and Maintenance on the San Acacia Reach of the Middle Rio Grande	Drew Baird or Robert Padilla, USBR, Denver, CO	USBR
P-9.	Comparison of HET and JET	Tony L. Wahl, USBR	USBR
P-10.	Comprehensive Sedimentation Analysis of the Sacramento River and Tributaries for Flood Management, Erosion Mitigation, and Habitat Enhancement Design	Brad Hall, M.S., P.E. <sup>1</sup> ; Andrey Shvidchenko, Ph.D. <sup>1</sup> ; Ron Copeland <sup>2</sup> , Ph.D., P.E.; and Lea Adams <sup>3</sup> , M.S., P.E. <sup>1</sup> Northwest Hydraulic Consultants, West Sacramento, CA; <sup>2</sup> Mobile Boundary Hydraulics, Clinton, MS; <sup>3</sup> USACE, Sacramento, CA	Consultant
P-11.	Conducting Simple Sediment Surveys Using Modern GPS, Sonar, and GIS Technology	Mark E. Hall and Jimmy R. Bramblett, USDA-NRCS, Athens, GA	USDA-NRCS
P-12.	Demonstrating the Capabilities of the KINEROS--AGWA Suite of Modeling Tools: Operational Flash Flood Forecasting and Assessing the Impacts of Management on Nitrate and Pesticide Runoff from an Agricultural Watershed	Carl Unkrich, USDA-ARS, Tucson, AZ	USDA-ARS
P-13.	Developing a Research Site for Suspended-Sediment Surrogates in the Piedmont Physiographic Province of the Southeastern United States	Mark N. Landers, USGS	USGS
P-14.	Development of a Flood Analysis Model for the Delaware River	Daniel Goode, Edward Koerkle, Joan Klipsch, and Amy Shallcross, USGS, State College, PA	USGS
P-15.	Effect of Well Cleaning and Pumping on Groundwater Supply and Quality of a Tsunami-Affected Coastal Aquifer in Sri Lanka	Dr. Meththika Vithanage <sup>1</sup> , K. G. Villholth <sup>2</sup> , K. Mahatantilla <sup>2</sup> , P. Engegaard <sup>1</sup> , and K. H. Jensen <sup>1</sup> <sup>1</sup> University of Copenhagen, Denmark; <sup>2</sup> Water Management Institute, Sri Lanka	International
P-16.	Effectiveness of Post-Fire Channel Treatments in Reducing Runoff and Sediment Transport	Joseph W. Wagenbrenner <sup>1</sup> , Peter R. Robichaud <sup>1</sup> , and Scott W. Woods <sup>2</sup> <sup>1</sup> USDA -FS, Rocky Mountain Research Station, Moscow, ID; <sup>2</sup> University of Montana, Missoula, MT	USDA-FS Univ. on MT
P-17.	Estimating Monthly Water Withdrawals, Return Flow and Consumptive Use	Kimberly Shaffer, USGS, Columbus, OH	USGS
P-18.	Evaluating KINEROS2 simulated sediment yields using multiple particle size distributions	D. Goodrich, T. Keefer, E. Canfield, R. Smith, M. Nichols, USDA-ARS, Tucson, AZ	USDA-ARS
P-19.	Examination of Curve Numbers from a Small Piedmont Catchment Under 33 Years of No-Till Crop Management	Dinku Endale, Harry Schomberg, Dwight Fisher, and Michael Jenkins, USDA-ARS, Watkinsville GA	USDA-ARS
P-20.	Expedient Cofferdam Technology for Repair of Gated Dams/Levees	J. E. Fowler, J. A. Padula, D. T. Resio, D. L. Ward, D. D. Abraham, S. J. Boc; USACE-ERDC, Vicksburg, Mississippi	USACE

POSTERS			
	Poster Abstract Title	Authors	Agency
P-21.	Extreme precipitation in a Changing Climate for New York and New England.	William Merkel <sup>1</sup> , Quan D Quan <sup>1</sup> , Art DeGaetano <sup>2</sup> , and Dan Zarrow <sup>2</sup> <sup>1</sup> USDA-NRCS, Beltsville, MD; <sup>2</sup> NOAA, Ithaca, NY	USDA-NRCS, NOAFA
P-22.	Field Adjustments of Bed Form Phase Diagrams	Drew C. Baird PhD., P.E., USBR Technical Service Center, Denver, CO	USBR
P-23.	Field Evaluation of Sediment-Concentration Errors Arising from Non-Isokinetic Intake Efficiency in Depth-Integrating Suspended-Sediment Samplers	Thomas A.Sabol, David J. Topping, and Ronald E.Griffiths, USGS, Flagstaff, AZ	USGS
P-24.	Fluvial Geomorphology of the Entiat River, WA and Implications for Stream Restoration	Jeanne E. Godaire, Kendra L. Russell, and Jennifer A. Bountry, USBR, Technical Service Center, Denver, CO	USBR
P-25.	Accounting for Legacy Sediment in Great Lakes Stream Restoration Approaches	Dr. Faith A. Fitzpatrick <sup>1</sup> , Michael J. Mlynarek <sup>2</sup> , Dr. James P Selegean <sup>3</sup> , and Marie C. Pepler <sup>1</sup> <sup>1</sup> USGS Wisconsin Water Science Center, Middleton, WI; <sup>2</sup> U.S. Fish & Wildlife Service, Whittlesey Creek National Wildlife Refuge, Ashland, WI; <sup>3</sup> USACE, Detroit District;	USGS USF&W USACE
P-26.	Grain-Size Evolution in Suspended Sediment and Deposits from the 2004 and 2008 High-Flow Experiments in the Colorado River Through Grand Canyon, Arizona	Amy E. Draut <sup>1</sup> , David J. Topping <sup>2</sup> , David M. Rubin <sup>1</sup> , John C. Schmidt <sup>3</sup> , Scott A. Wright <sup>4</sup> <sup>1</sup> USGS, Santa Cruz, CA; <sup>2</sup> USGS, Flagstaff, AZ; <sup>3</sup> Dept. of Watershed Sciences, Utah State University, Logan, UT; <sup>4</sup> USGS, Sacramento, CA	USGS
P-27.	Impact of Flow-Duration Curve Temporal Resolution on Sediment Load Estimates	Li Chen, Rina Schumer, Anna Knust, and William Forsee, Desert Research Institute, Las Vegas, NV	DRI
P-28.	Importance of Groundwater Conservation and Alternative Measures to Sustain Agricultural Production in the Mississippi Delta Region of Eastern Arkansas	Chris King, USDA-NRCS, Little Rock, AR	USDA-NRCS
P-29.	Innovative Streambank Protection Methods: Improved Guidance for Stone Toe and Bendway Weirs	Meg Jonas, USACE-ERDC, Vicksburg, MS	USACE
P-30.	KINEROS-OPUS--Spatially Based Watershed Hydrologic and Biogeochemical Modeling	Jamie Massart, ARS, Tucson, AZ	
P-31.	Loads of Suspended Sediment and Selected Trace Elements in the Clark Fork Basin, Montana, Before and After the Removal of Milltown Dam	Steven K. Sando and John H. Lambing; USGS, Helena, MT	USGS
P-32.	Long-Term Sediment Transport Trends in Illinois Watersheds	Laura L. Keefer, Misganaw Demissie, Rich Allgire, and David Crowder, Center for Watershed Science, Illinois State Water Survey, Champaign, IL	University of Illinois
P-33.	Measurements of Suspended Sediment and Flow Distribution with Implications for Habitat Restoration in the Skagit River Delta, Washington	Christopher A. Curran, Eric E. Grossman, Mark C. Mastin, and Raegan Huffman, USGS	USGS
P-34.	Multi-Scale Hydrometeorological Modeling, Land Data Assimilation and Parameter Estimation with the Land Information System	Christia Peter-Lidard <sup>1</sup> , Sujay Kumar <sup>1</sup> , Joseph Santanello Jr <sup>1</sup> , Rolf Reichle <sup>1</sup> , John Eylander <sup>2</sup> , and Michale Elk <sup>3</sup> <sup>1</sup> NASA Goddar Space Flight Center, MD; <sup>2</sup> USAF Offut, Omaha, NE; <sup>3</sup> NOAA Environmental Modeling Center, MD	NASA, USAF, NOAA
P-35.	New Nonpumping, Unattended Sampler Has Been Developed, Tested, and Is Ready for Suspended-Sediment Sample Collection	Patrick P. Rasmussen, Casey J. Lee, Broderick E. Davis, and Wayne O'Neal, USACE	USGS Consultant
P-36.	One-Dimensional Sediment Modeling of the Middle Rio Grande From Cochiti Dam to Elephant Butte Reservoir	David Varyu, USBR Technical Service Center, Denver, CO	USBR
P-37.	Overland Transport of Manure-Borne Pathogen and Indicator Organisms: Modeling and Uncertainty Assessment with the KINEROS-STWIR Model	Dr. Yakov Pachepsky <sup>1</sup> , A. K. Guber <sup>1</sup> , D. R. Shelton <sup>2</sup> , and D. C. Unkrich <sup>2</sup> <sup>1</sup> USDA-ARS Beltsville MD; <sup>2</sup> USDA-ARS Tucson AZ	USDA-ARS
P-38.	Parallelization Techniques in Sediment Transport Modeling	Phu V. Luong, Keith Martin, and Phu V. Luong, PhD; USACE-ERDC	USACE
P-39.	Processing Information from Data Recorders and Websites in Spreadsheets	Darrell Fontane <sup>1</sup> and John Mckenzie <sup>2</sup> <sup>1</sup> CSU, Boulder, CO; <sup>2</sup> Ditch &Res Co Alliance	CSU, Local

POSTERS			
	Poster Abstract Title	Authors	Agency
P-40.	Relations Between Turbidity and Suspended-Sediment Data, Multi-Frequency Sideways-Looking Acoustic-Doppler Data, and LISST Data in the Colorado River in Grand Canyon	Nicholas Voichick and David J. Topping; USGS, Flagstaff, AZ	USGS
P-41.	River2D-Morphology: A Two-Dimensional Finite Element River Morphology and Gravel Transport Model.	Stephen Kwan <sup>1</sup> , Jose A. Vasquez <sup>2</sup> , and Robert G. Millar <sup>1</sup> <sup>1</sup> University of British Columbia, Vancouver, BC, Canada; <sup>2</sup> Northwest Hydraulic Consultants, North Vancouver, British Columbia	Univ of BC
P-42.	Safety, Monetary, and Environmental Comparison of Footbridges and Cableway Installations for Peak-Flow Monitoring of Sediment and Discharge in the Ouachita Mountains, Arkansas	Daniel A. Marion <sup>1</sup> and Jaysson E. Funkhouser <sup>2</sup> <sup>1</sup> USDA Forest Service, Hot Springs, AR; <sup>2</sup> USGS, Little Rock, AR	USDA-FS
P-43.	Sediment Load Variability and Sediment Sources for Forest Headwater Streams in the Southern Sierra Nevada, California	Carolyn Hunsaker <sup>1</sup> , Jason Adair <sup>1</sup> , and Kurt Weidich <sup>2</sup> <sup>1</sup> USDA -FS, Fresno, CA; <sup>2</sup> California State University, Chico, CA	USDA-FS
P-44.	The use of the Multi-Dimensional Surface-Water Modeling System (MD_SWMS) in Calculating Discharge and Sediment Transport in Remote Ephemeral Streams.	Griffiths, Ronald E. <sup>1</sup> , Richard R. McDonald <sup>2</sup> , David J. Topping <sup>1</sup> , and Thomas A. Sabol <sup>1</sup> <sup>1</sup> USGS, Flagstaff, AZ; <sup>2</sup> USGS, Golden, CO	USGS
P-45.	Sedimentation Analysis--Suncook River in Epsom, NH	Robert H. Flynn, P.E., USGS, Pembroke, NH	USGS
P-46.	Simulation of Regional-Scale Groundwater/Surface-Water Interaction in the Upper Klamath Basin of Oregon and California	Marshall Gannett <sup>1</sup> and Brian Wagner <sup>2</sup> <sup>1</sup> USGS, Portland, OR; <sup>2</sup> USGS, Menlo Park, CA	USGS
P-47.	The Use of a Coupled Groundwater Simulation and Optimization Model to Guide Groundwater Management in the Upper Klamath Basin, Oregon and California	Brian Wagner <sup>1</sup> and Marshall Gannett <sup>2</sup> <sup>1</sup> USGS, Menlo Park, CA; <sup>2</sup> USGS, Portland, OR	USGS
P-48.	Using Remotely Sensed Data to Force and Constrain a Hydrologic Model in Remote Regions	Mike Follum and Brian Skahill, USACE, Vickburg, MS	USACE
P-49.	Variations in Annual Turbidity/ Suspended-Sediment Concentration Regression Models to Calculate a Suspended-Sediment Load Record, North Santiam River, Oregon, 2003-2008	Heather Bragg, USGS, Portland, Oregon	USGS
P-50.	Water Purification Process at Children Anti-tuberculosis Sanatorium in Aral Sea Area: Nukus Town, Republic of Karakalpakstan, Uzbekistan	Dilmurod Gaybullaev and Vladimir Krepl, Czech University of Life Sciences, Prague, Czechoslovakia	Czech University

STUDENT POSTERS			
	Student Poster Abstract Title	Authors	Agency
SP-1.	A Combination Method Coupling SEBAL and GG Models for Extending Remotely Sensed Evapotranspiration to Days Without Images at Watershed Scales	Di Long and Vijay P. Singh, Texas A&M University	TX A&M
SP-2.	A Parsimonious Dynamic Flow Model for Hydrological Applications	April Warnock, University of Michigan	U. of MI
SP-3.	A Simple Close Range Photogrammetry Technique to Assess Soil Erosion in the Field	Sayjro Kossi Nouwakpo, Chi-hua Huang, Jim Frankenberger, and James Bethel, Purdue University-Soil Erosion Laboratory, West Lafayette, IN	Student Purdue University
SP-4.	Application of Digital Oblique Photogrammetry for Monitoring Erosion and Sedimentation at Mount St. Helens, Washington, USA	Adam Mosbrucker, USGS, Cascades Volcano Observatory, Vancouver, WA	Student Portland State University
SP-5.	Applying the University of Washington's Distributed Hydrology Soil Vegetation Model (DHSVM) on Forested Basins in Northern California	Brian Huggett, Humboldt State University, Arcata, CA	Student Humboldt
SP-6.	Continuous Suspended Sediment Concentration Monitoring Using a Permittivity Sensor	Barbra C. Utley, Tess M. Wynn, and Naiqian Zhang, Virginia Polytechnical University, Blacksburg, VA	Student VA Tech
SP-7.	Coupling Surface Flow Phenomena with Dynamics in the Unsaturated and Saturated Zones	Jongho Kim, April Waarnock, Valeriy Ivanov, and Nikolaos Katopodes, University of Michigan	U. of MI
SP-8.	Evaluation of an in-situ Measurement Technique for Streambank Critical Shear Stress and Soil Erodibility	Cami Charonko and Tess Wynn, Virginia Polytechnical University, Blacksburg, VA	Student VA Tech
SP-9.	Evaluation of Sediment Loading Predictions with the Distributed Hydrology Soil Vegetation Model (SHSVM) in a Small, Timber-Harvested Watershed in Northern California	Brian Huggett, Humboldt State University, Arcata, CA	Humboldt St. U.
SP-10.	Formation and Evolution of Concentrated Flow-Induced Erosion of Rangeland Hillslopes	Katie Costigan <sup>1</sup> , Mark Weltz <sup>2</sup> and Jeffrey Stone <sup>3</sup> <sup>1</sup> University of Nevada, Reno, NV; <sup>2</sup> USDA-ARS, Reno, NV; <sup>3</sup> USDA-ARS, Tucson, AZ	University Student?
SP-11.	Groundwater-Surface Water Interactions in the Truckee River, Reno NV	Wes Henson and Harmony Ann Farnsworth, University of Nevada, Reno, NV	UNV
SP-12.	Hydrometeorological Analysis of Flooding Events in San Antonio, TX	Singaiiah Chintalapudi, University of Texas at San Antonio, TX	U of TX
SP-13.	Hydrometeorological Analysis of the 2002 Guadalupe River Flood, TX	Almoutaz El Hassan, University of Texas at San Antonio, TX	U. of TX
SP-14.	Identifying Sub-Basins Most Vulnerable to ENSO and PDO within the Rio Grande Basin	Chundun Prakash Khedun <sup>1</sup> , Vijay P. Singh <sup>1</sup> , John R. Giardino <sup>1</sup> , and John D. Bolten <sup>2</sup> <sup>1</sup> Texas A&M; <sup>2</sup> NASA, Greenbelt, MD	TX A&M, NASA
SP-15.	Lessons learned from the deployment of a laser transmissometer in a shallow Piedmont river	Andrea Althoff, USGS Student Hydrologist and UGA Graduate Student	Student, UGA
SP-16.	River Response to Dam Removal: Case Study from the Souhegan River and the Merrimack Village Dam, Merrimack, New Hampshire	Adam J. Pearson, Noah P. Snyder, Mathias J. Collins, Boston College, Chestnut Hill, MA	Student, NOAA
SP-17.	Sediment transport and channel form in a reconfigured gravel bed channel	Susannah O. Erwin <sup>1</sup> , John C. Schmidt <sup>1</sup> , Peter R. Wilcock <sup>2</sup> <sup>1</sup> Intermountain Center for River Rehabilitation and Restoration, Utah State University, Logan UT <sup>2</sup> Department of Geography and Environmental Engineering, The Johns Hopkins University, Baltimore MD	Utah State Student
SP-18.	Spatial Distribution of Fire Effects in Forests Using GIS Tools	Mariana Dobre, Washington State University, Pullman, WA	Student Washington State Univ.
SP-19.	Surface Water Flow Modeling of Kalamazoo River Basin	Rabi Gyawali, Michigan Technological University	MI Tech. U.
SP-20.	Temporal Variation in Riverine Nutrient Concentrations and the Impact of Short Term Storm Events on Nutrient Loading in Hood Canal	Nick Ward, University of Washington School of Oceanography	U. of WA

## Conference Registration Form: *SPECIAL \$50 DISCOUNT WITH ADVANCE REGISTRATION*

### Joint 9th Federal Interagency Sedimentation Conference and 4th Federal Interagency Hydrologic Modeling Conference June 27 to July 1, 2010

Make checks payable to: "Federal Interagency Sedimentation Conference"\*. Checks must be issued in U.S. dollars and drawn on U.S. banks. Registrations must be accompanied by payment. For early registration discount, postmark form before May 31, 2010. **Mail to** Annette Ledford, JFIC Registration, USGS, 415 National Center, Reston, VA 20192 or FAX her at (703)648-6693. Please contact Annette at (703) 648-5303, email [aledford@usgs.gov](mailto:aledford@usgs.gov) Jeff Rieker at (775) 884-8375, email [jrieker@usbr.gov](mailto:jrieker@usbr.gov) or Paula Makar at (303) 445-2555, email [pmakar@usbr.gov](mailto:pmakar@usbr.gov) if you have any questions. **Register on-line at [www.jfic.us](http://www.jfic.us).**

REGISTRANT INFORMATION	CONFERENCE ITEM	Before May 31	After May 31	Number	Total
Name: _____	Full Conference	425	475
